CREST CPSA NETWORK PORTS & SERVICES CHEAT SHEET

Complete Reference Sheet • Extracted from CPSA Examination Study Material

1. WEB, DIRECTORY & IDENTITY SERVICES

Port	Transport	Service Name	Functional Description
80	TCP	HTTP	Hypertext Transfer Protocol; unencrypted web communications.
88	TCP / UDP	Kerberos	Ticket-based network authentication protocol used in Active Directory.
389	TCP / UDP	LDAP	Lightweight Directory Access Protocol; directory query interface.
443	TCP	HTTPS	Hypertext Transfer Protocol Secure (TLS/SSL encryption).
636	TCP	LDAPS	Secure Lightweight Directory Access Protocol over TLS/SSL.

2. REMOTE ACCESS, ADMINISTRATION & DISPLAY SERVICES

Port	Transport	Service Name	Functional Description
22	TCP	SSH	Secure Shell; encrypted remote terminal and command execution.
23	TCP	Telnet	Unencrypted legacy remote terminal emulation.
512	TCP	rexec	Remote execution daemon requiring explicit username/ password credentials.
513	TCP	rlogin	Remote login utility; authenticates via .rhosts / hosts.equiv trust relationships.
514	TCP	rsh / rcp	Remote shell and remote file copy; trust-based unencrypted execution.
1629	TCP	DameWare	DameWare Mini Remote Control alternate listener port.
3389	TCP	RDP	Microsoft Remote Desktop Protocol for full graphical desktop sessions.
5900	TCP	VNC	Virtual Network Computing; graphical desktop sharing system.
6000	TCP (6000–6063)	X11	X Window System display server; can be intercepted if not SSH tunneled.
6129	TCP	DameWare	DameWare Mini Remote Control primary service listener.

3. FILE TRANSFER & NETWORK FILE SYSTEMS

Port	Transport	Service Name	Functional Description
21	TCP	FTP	File Transfer Protocol (control connection).
69	UDP	TFTP	Trivial File Transfer Protocol; unauthenticated UDP bootstrap transfer.
445	TCP	SMB	Server Message Block; direct host file sharing without NetBIOS encapsulation.
2049	TCP / UDP	NFS	Network File System; Unix-based distributed file system protocol.

4. WINDOWS RPC & NETBIOS SERVICES

Port	Transport	Service Name	Functional Description
111	TCP / UDP	RPC / Portmapper	Maps RPC service program numbers to transport ports (query via rpcinfo).
135	TCP	Windows RPC (EPM)	Microsoft Endpoint Mapper; routes dynamic RPC requests to services.
137	UDP	NetBIOS Name	Name registration and resolution services (nbtstat).
138	UDP	NetBIOS Datagram	Connectionless transmission of data messages across local subnets.
139	TCP	NetBIOS Session	Connection-oriented session services (SMB over NetBIOS).

Port	Transport	Service Name	Functional Description
593	TCP	RPC over HTTPS	Encapsulates Microsoft RPC communications within HTTPS requests.

5. DATABASE MANAGEMENT SYSTEMS

Port	Transport	Service Name	Functional Description
118	TCP / UDP	SQL Services	Standard IANA assigned SQL communication port.
159	TCP / UDP	SQL Server	Legacy SQL server multiplexing port.
1433	TCP	MS-SQL Server	Microsoft SQL Server default relational database engine listener.
1434	UDP	MS-SQL Monitor	SQL Server Browser; resolves named instances to dynamic TCP ports.
1521	TCP	Oracle DB	Oracle database TNS (Transparent Network Substrate) listener.
3306	TCP	MySQL	MySQL / MariaDB database service port.
5432	TCP	PostgreSQL	PostgreSQL object-relational database management system.
9001	TCP	HSQL Database	HyperSQL Java relational database engine (also listed under Tor relay).

6. ROUTING, CORE INFRASTRUCTURE & NETWORK CONTROLS

Port	Transport	Service Name	Functional Description
49	TCP / UDP	TACACS	Terminal Access Controller Access Control System; router AAA service.
53	TCP / UDP	DNS	Domain Name System; UDP for queries, TCP for zone transfers (AXFR).
67	UDP	DHCP (Server)	Dynamic Host Configuration Protocol server endpoint.
68	UDP	DHCP (Client)	Dynamic Host Configuration Protocol client endpoint.
123	UDP	NTP	Network Time Protocol; network clock synchronization.
161	UDP	SNMP	Simple Network Management Protocol; management agent queries.
179	TCP	BGP	Border Gateway Protocol; exterior path-vector inter-AS routing.
201	TCP / UDP	AppleTalk	AppleTalk routing maintenance and control protocol.
500	UDP / TCP	IKE / ISAKMP	Internet Key Exchange; negotiates IPsec security associations.
514	UDP	Syslog	System logging daemon endpoint (distinguished from TCP 514 rsh).
520	UDP	RIP	Routing Information Protocol; distance-vector routing mechanism.
546	UDP	DHCPv6 Client	IPv6 dynamic host configuration client port.
567	UDP	DHCPv6 Server	IPv6 dynamic host configuration server (per CPSA study text).
1194	UDP / TCP	VPN	Virtual Private Network listener (default OpenVPN port).

7. MAIL & MESSAGING SERVICES

Port	Transport	Service Name	Functional Description
25	TCP	SMTP	Simple Mail Transfer Protocol; server-to-server mail routing.
110	TCP	POP3	Post Office Protocol version 3; client email retrieval.
143	TCP	IMAP	Internet Message Access Protocol; multi-client synchronized mail access.
587	TCP	SMTP (Submission)	Mail submission port for authorized user-agent delivery.
5060	TCP / UDP	SIP	Session Initiation Protocol; VoIP and multimedia signaling.
5222	TCP	Jabber (XMPP)	Extensible Messaging and Presence Protocol client connection.
6667	TCP	IRC	Internet Relay Chat plain-text communication service.
9090	TCP	Openfire	Openfire XMPP server administrative web interface.

8. PROXIES, MONITORING & LEGACY PROTOCOL HANDLERS

Port	Transport	Service Name	Functional Description
1	TCP	TCPMUX	TCP Port Service Multiplexer; multiplexes multiple services on one port.
5	TCP	RJE	Remote Job Entry; batch processing submission on legacy mainframes.
7	TCP / UDP	Echo	Returns whatever data is sent to it; diagnostic protocol / ICMP test.
18	TCP	MSP	Message Send Protocol.
29	TCP	MSG ICP	MSG ICP Protocol.
37	TCP / UDP	Time	Time Protocol; sends machine-readable seconds since 1900.
42	TCP / UDP	Nameserv	Host Name Server legacy directory lookup.
43	TCP	WHOIS	Directory query protocol for domain registrant identification.
70	TCP	Gopher	Pre-web hierarchical document retrieval system.
79	TCP	Finger	User information enumeration protocol on Unix systems.
103	TCP	X.400	ITU-T standard for email/message handling systems.
119	TCP	NNTP	Network News Transfer Protocol; Usenet discussion groups.
190	TCP	GACP	Gateway Access Control Protocol.
197	TCP	DLS	Directory Location Service.
396	TCP / UDP	Novell NetWare	Novell NetWare operating services over IP.
444	TCP / UDP	SNPP	Simple Network Paging Protocol.
458	TCP / UDP	Apple QuickTime	QuickTime streaming service port.
902	TCP / UDP	VMware	VMware Server console and ESXi host authentication/ management.
1080	TCP	SOCKS Proxy	Generic circuit-level proxy server framework.
3128	TCP	Squid Proxy	Squid HTTP caching and web proxy service default port.
5666	TCP	Nagios (NRPE)	Nagios Remote Plugin Executor daemon for remote host metrics.
9001	TCP	Tor	The Onion Router relay and ORPort communication listener.
9100	TCP	JetDirect	HP JetDirect raw socket printing service (AppSocket).
